

**“YOU BET MY KEY
PRIORITY IS
CREATIVITY –
NOT WORRYING
ABOUT DATA!”**

Just as well there's a simple solution:
RAID systems from certon.

Maximum security for your data.
Thanks to certon storage systems.

certon
systems

“KEEP YOUR CREATIVE OUTPUT SAFE. SO YOU CAN KEEP UP THE CREATIVITY.”

5 reasons why certon's RAID systems make sense.

- 1 › **Because everything's safe – and stays safe.** Photos, videos, audio files. Doubtless the lifeblood of your business. So don't risk everything by relying on external hard drives to store data. Imagine something went wrong – whoops, there goes all your data! If it's important to you, trust RAID systems.
- 2 › **Because they're easy to use.** RAID may sound like some technical acronym, but with certon, you need about as much IT knowledge as it takes to plug in a USB stick. Just unpack, plug it in, and begin . . .
- 3 › **Because they process data in the blink of an eye.** Huge files? No problem with RAID systems, which can match any local hard drive when it comes to speed.
- 4 › **Because they're totally compatible.** PC, Mac, Linux, Unix? You name it, our RAID solutions run with it.
- 5 › **Because they're specially designed for imaging.** When you work with certon RAID systems, they practically do the job for you. You can save, copy, edit and delete image files – and you can even access them remotely when out and about. Need more advanced options? No problem: our systems can be expanded in a variety of ways.

RAID systems should be an integral part of every professional's basic set-up. Not only are certon storage solutions incredibly secure, they're ideally matched to the requirements of photographers, audio experts and video professionals. In a nutshell, if you need to store large volumes of data reliably, quickly and without hassle, certon has what it takes.

systems

› smartRAID

THE CLEVER WAY TO STORE DATA

4 TB | 6 TB | 8 TB | 12 TB* | Barebone

*available for immediate order

- › Network-attached storage (NAS)
- › Transfers data at speeds up to 119 MB/s
- › RAID Level 5
- › Four hard drives certified for round-the-clock operation

2-year guarantee on hard drives

COMPREHENSIVE, FULL-SERVICE PACKAGES FOR INDIVIDUALS AND SMALL NETWORKS

smartRAID stores your data, safe and sound, with lightning speed. It's also simple to integrate into existing systems and processes. If you want to, you can even work with different systems, such as MacBook and iPad.

Access all your data, in an instant, from any terminal on your network. The transfer speeds are even faster than the internal hard drive on your computer. Not only that, but your data could hardly be safer. So even if a hard drive packs in, your data remains safe and sound. At the slightest indication of a hitch, smartRAID flags the problem with a warning light, an email, a status update in the smartRAID Control Center, or even a voice message (or as some call it, a 'voice error report' – though we think that's a bit dry for such a friendly sounding voice).

Want to use your own hard drive? If you do, then go with our barebone version, which is just as secure and convenient as our other systems.

› studioRAID Blueline

THE NEXT GENERATION OF HIGH SECURITY DATA STORAGE DEVICES

8 TB | 12 TB | 16 TB | 24 TB*

*available for immediate order

- › Network-attached storage (NAS)
- › Transfers data at speeds of up to 119 MB/s
- › High security: RAID Level 6
- › Eight hard drives certified for round-the-clock operation

2-year guarantee on hard drives

WHY COMPROMISE? THE IDEAL STORAGE SOLUTION FOR UP TO 10 WORKSTATIONS

If your daily routine involves using anywhere between 2 and 10 workstations, then the network-compatible studioRAID Blueline is ideal for your business.

The beauty of this system: the in-built system for managing data access rights. So you won't need to administrate this externally. With RAID Level 6, even if two hard drives go down at the same time, no data is lost. This makes studioRAID Blueline the ideal safe storage solution for your day-to-day business requirements and backup.

What's more, you can access, edit and store data from anywhere in the world. Sound too complicated? Not at all – with certon you can set up an entire FTP server at the click of a mouse.

> studioRAID

THE ULTIMATE IN DATA SECURITY

4 TB | 6 TB | 8 TB
12 TB | 18 TB | 24 TB

- > Network-attached storage (NAS)
- > Transfers data at speeds of up to 119 MB/s
- > High security: RAID Level 6
- > Eight hard drives, all totally compatible with computer centre requirements

5-year guarantee on hard drives

> gemSTONE

TURBO STORAGE FOR AUDIO AND VIDEO PROFESSIONALS

8 TB | 16 TB | 24 TB | Barebone

- > Direct-attached storage (DAS)
- > Transfers data at speeds of up to 220 MB/s
- > Pre-configured for RAID Level 6
- > Eight hard drives, all totally compatible with computer centre requirements

5-year guarantee on hard drives

OUR HIGH-END SOLUTION FOR LONG-TERM DATA STORAGE

Need a little bit more 'oomph'? Then it's time to meet our studioRAID system. Not only is it ideal for everyday use, it can also be used as a backup or archiving system. So it's perfect for taking care of your entire data collection.

Images you're working on right now, files you'll need in the future, or past records you need to keep for legal reasons. Whatever you need to store, studioRAID is the answer. The system boasts a massive top-end storage capacity of 24 TB – making it ideal for all your storage requirements. And just in case you do need even more storage space, you can expand studioRAID in a variety of ways.

To make sure nothing gets between you and your work, we've even put a bit of space aside for your media files. You'll love the pre-installed iTunes and DLNA media server – very handy!

OUR ULTRA HIGH-PERFORMANCE MASS STORAGE DEVICE FOR THE AUDIO AND VIDEO INDUSTRY:

e-SATA, USB 2.0, USB 3.0, iSCSI, FireWire 800 – whatever the system, with gemSTONE plugged into your computer, the job gets done.

Specially tailored to the needs of audio and video professionals, this system is ideal for complex, high-volume data. It offers superlative performance and totally reliable data transfer. Simply plug the gemSTONE directly into your computer for whopping transfer rates of up to 220 MB/s. In fact, gemSTONE is more than three times faster than average local hard drives, so it certainly won't slow down your systems.

You'll also be quietly contented with how quiet this system is: the gemSTONE's intelligent temperature monitoring system ensures the two fans only run when needed. If you need to keep using your own hard drive, just ask about our barebone system. Naturally, it's just as safe, reliable and easy to use as the other products in our range.
